

Product Specification Sheet

Targus DEFCON® CL Eyelet Lock

Part #: ASP21US

Product Description:

The Targus DEFCON® CL Eyelet Lock is a secondary lock designed to secure a monitor, projector, port rep, or other devices with a lock slot when used with an existing cable notebook lock. The durable, galvanized steel cable eyelet allows notebook locks to be easily passed through, so both locks can link together. The 4-digit resettable combination lock can be updated by the user at any time for added security and features over 10,000 possible combinations. Great for users who need to lock several devices simultaneously in the office, at school, during tradeshows or while on the road.

Product Features and Specifications:

- **Functionality** - Designed for use with an existing notebook cable lock
- **Protection** - Constructed with a durable, vinyl-coated galvanized steel cable
- Eyelet allows user to easily slide through the existing notebook cable lock
- Locks devices equipped with a lock slot, including monitors, projectors, port replicators and docking stations
- 4-digit resettable combination
- Features over 10,000 possible combinations
